Section -A

Q 1. Read the following passage carefully and answer the questions by writing the options that you consider the most appropriate in your answer sheet.

Fifty years ago people ate ice cream only in summer. Now it is eaten all the year round. It originated in the Orient, centuries before English schoolboys first tasted it. Marco Polo saw people eating ice cream there and brought back the idea to Italy. From Italy the idea was carried to France. It became very popular in France with the rich, and an effort was even made to keep the recipes a secret from the common people. But, of course, they soon learned about this delicious new food and ice
cream became popular with everyone. Soon it spread all over the world. The first factory to manufacture ice cream was started in Baltimore, Maryland, in 1851. However, the real development of ice cream and the ice cream business didn’t take place until after 1900 with new developments in refrigeration.

The basis of all ice cream is cream, milk or milk solids, sugar, and sometimes eggs. Vanilla, chocolate, berries, fruit ingredients, and nuts are added as flavors. This is the usual proportion of ingredients in ice cream: about 80 to 85 percent cream and milk products, 15 percent sugar, half to four and a half per cent flavoring, and three-tenths of one per cent stabilizer.

A small amount of gelatin is used in order to retain the smoothness of the ice cream by preventing the formation of ice crystals.

When you eat a third of a pint of vanilla ice cream, you are getting about as much calcium, protein, and vitamin B as are in half a cup of whole milk, and as much vitamin A and calories as are in one cup of milk.

A. The major change towards Ice cream is that

i. it is eaten throughout the year
ii. it is eaten as a desert
iii. it is eaten in summer
iv. it is eaten in winter

B. Ice cream became popular with everyone

i. when the idea was carried from Italy to France
ii. when English school boys tasted it
iii. when the rich in France started eating it
iv. when the common people learned about its recipe

C. The introduction of refrigeration led to the

i. increased consumption of ice cream
ii. development of the ice cream business
iii. increase in the production of ice cream
iv. improvement in the quality of ice cream
D. The smoothness of ice cream is retained by

i. forming ice crystals
ii. using a small amount of gelatin
iii. using eggs
iv. using cream and milk

E. Find a word from the passage that means the same as “tasty”

i. recipes
ii. gelatin
iii. delicious

Q 2. Read the given poem carefully and answer the questions by writing options you consider the most appropriate in your answer sheet against the correct question number. (5 Marks)

PETE AT THE ZOO

I wonder if the elephant
Is lonely in his stall
When all the boys and girls are gone
And there is no shout at all,
And there is not one to stamp before,
No one to note his might.
Does he hunch up as I do,
Against the dark of night?
Gwendolyn Brooks

A. From these lines we understand that the speaker:

i. is fond of the dark
ii. is scared of being alone
iii. enjoys being alone
iv. hates being left alone in the dark

B. The speaker wonders if the elephant is lonely because:

i. all the boys and girls have gone
ii. the boys and girls are no longer playing with the elephant
iii. the speaker has not visited the elephant
iv. the speaker herself is lonely

C. The elephant hunches up because

i. he is tired and lonely
ii. his back is aching
iii. he is frightened of the dark
iv. he is frightened of the other animals

D. With reference to the poem, what does ‘might’ mean?

i. Uncertainty
ii. Doubt
iii. Strength
iv. Ability

E. The last two lines suggest that the poet

i. enjoys being alone as she finds the children too noisy
ii. likes night because she is not very social
iii. does not like night because it makes her feel lonely
iv. does not like night because the elephant is not with her
Q3. Read the following passage carefully and answer the questions by writing the option that you consider the most appropriate in your answer sheet. (1X5 = 5 Marks)

Unconsciousness is a state where a person appears to be in deep sleep from where he/she cannot be awoken. The individual does not respond to any external stimuli, like sprinkling cold water on the face, and for that matter even painful ones like piercing with a pin, tingling a nerve etc. This insensible state is brought about by some interference in the normal functioning of the brain and the nervous system.

Unconsciousness when partial is called stupor and when complete is called coma. In cases of stupor, the individual can be roused with difficulty but the eyelids cannot be opened due to resistance by the individual. In a coma, however there is no response when an individual is being called, the lid can be opened without any resistance.

The usual case of unconsciousness includes fainting, sunstroke, concussion (brain injury), etc. Fainting is caused by the temporary reduction in the blood supply to the brain because of fright, unexpected good or bad news etc. People held up in stuffy places like the elevators often faint. A sudden fall in blood pressure can also cause fainting. The individual appears pale, becomes weak and slow, breathing becomes shallow and skin turns cold and clammy. Excessive summer heat can make the individual faint. Prolonged exposure to sun may cause sunstroke, which starts with headache, vomiting, dizziness, cramps or dryness of the throat.

Concussion commonly results in unconsciousness. Direct injury to the brain caused by either a blow on the head or a fall from a height etc may result in concussion. The patient may ‘black out’ for a short time. An individual could suddenly become unconscious due to a heart attack. The initial signs are vomiting, profuse sweating and pain on the left side of the chest.

A. Unconsciousness is caused

i. by piercing with a pin
ii. by tingling a nerve
iii. by some interference in the normal functioning of the nervous system
iv. by sprinkling cold water on the face

B. Stupor is

i. complete unconsciousness
ii. partial unconsciousness
iii. deep sleep
iv. also known as coma
C. Temporary reduction in the blood supply to the brain usually results in

i. sleep  
ii. coma  
iii. fainting  
iv. low blood pressure

D. The initial signs of heart attack are

i. vomiting, dizziness and cramps  
ii. low blood pressure and clod skin  
iii. pale face and weakness  
iv. vomiting, profuse sweating and pain on the left side of the chest

E. A word in the passage which means the same as ‘opposition’ is

i. interference  
ii. resistance  
iii. reduction  
iv. concussion
