| June/July | Addition and subtraction | Lesson - 3 Give and Take | ● Addition and subtraction of 2/3 digit numbers.  
● Estimation and comparison.  
● Addition and subtraction by breaking the numbers.  
● Solving word problems.  
● Solves puzzles based on addition and subtraction.  
● Estimation. | ● Addition and subtraction of 2 digit numbers using 10 * 10 number grid.  
● Narrate a story and ask questions based on addition and subtraction.  
● Card games: Prepare some number cards on pieces of cardboard. Make different shapes for different place values.  
● Find the odd one out.  
● Write the missing number.  
● Word problems from their daily life on addition and subtraction of numbers upto three digits.  
● Practise questions from question banks  
● Worksheet | ● Adds and subtracts 2/3 digit numbers without grouping with grouping.  
● Adds 2/3 digit numbers using expanded notation (split and add).  
● Mental Maths (Simple addition in mind).  
● Solves word problems related to addition and subtraction.  
● Solves puzzles on addition and subtraction.  
● Understands that sum/in all/ altogether are for addition. | ● Flash cards of numbers.  
Puzzle games on addition and subtraction.  
Age and class appropriate work sheets. | ● Estimation  
Creative thinking  
Computation ability. | 16    |

| July  | ● MEASUREMENT  
  ● Standard and non standard unit of length | Lesson - 4 Long and short | ● Distinguish between standard and non standard units of length.  
  ● Estimation and comparison.  
  ● Understanding the unit of length.  
  ● Find distance between two points. | ● Measure the length of different objects (Book, Table stick, black board etc) with fingers, hand span, pace and cubit and compare the length  
  - Repeat the above activity using scale, measuring tape and compare  
  ● Find shortest/longest route between two points.  
  Make a metre rope.  
  ● Find out the height of fellow students, objects etc.  
  ● Reading the map scale.  
  ● To find shortest/longest route between two points  
  ● Word Problems  
  ● Which of these will be in cm and which will be in metres. Size of objects and units to be used. | ● Measures length using appropriate standard units (cm, m, km).  
  ● Knows how to use a ruler.  
  ● Estimates and then verify by measuring.  
  ● Understands why we need standard unit of length.  
  ● Finds distance between two points. | ● Measuring tape,  
  ● Height bar  
  ● Rope  
  ● Shoe string  
  ● Thread  
  ● Map of city | ● Accuracy  
  ● Estimation  
  ● Conversion of units | 16 |

| August | **Geometry** (Shapes) | Lesson - 5 Shapes and Designs | ● Understanding of shapes  
 ● Understanding of straight and curved lines  
 ● Understanding of corners, sides, and diagonals  
 ● Understanding of 2D and 3D shapes.  
 ● Making different patterns using shapes  
 ● Puzzles (tengram) | ● Draw and colour different geometrical shapes,  
 ● Cut out different shapes from cardboard. Make patterns and designs with these shapes,  
 ● Observe car wheel, trunk of tree, leaves brick, sun, moon, flower, chick, kite, chalk box, pencil box etc and find faces, edges, vertices, and find out whether edges are straight line or curved,  
 ● Make tangram with paper squares and create different designs using them,  
 ● Observe patterns in the border (saris/shawls/ rugs/ mats/ Bed covers etc) Which geometrical shapes one observes in these borders? Is any shape repeating in a particular pattern? Are the shapes made of curved/straight or both.  
 ● Riddles and games like treasure hunt  
 ● Paper cutting/ paper folding to make weaving pattern.  
 ● Worksheet | ● Draws different figures using different shapes,  
 ● Understands the meaning of edges and corners,  
 ● Understands the difference between straight and curved lines. Draws shapes of animals, people and things from pieces of tangram (5 pieces and 7 pieces).  
 ● Recognizes and identifies the shapes in weaving pattern  
 ● Creates weaving patterns using different geometrical shapes.  
 ● Identifies positions (up, down, front, behind) Distance (near, far) Size (small, big, tall, short) corners and shapes. | • Tangram  
 • Models of geometrical shape (cube, cuboids, cone, cylinder, sphere). | ● Understands the nuances of two dimensional and three dimensional shapes.  
 Appreciates various geometrical patterns and models. | 10 |

| Sept. | ● Time.  | Lesson - 7 | ● Understanding of hour, minutes, seconds. | ● Activity how many times? Eg: Jumping, running, clapping, skipping, writing.  
● Tongue twisters in a minute.  
● Topsy turvy time.  
● Prepare a chart/time of your daily routine.  
● Make a calendar of your own.  
● Make a clock.  
● Make a class time table.  
● Make a chart month wise giving details of your friend/relatives/parents/family/anniversaries.  
● Mark who is oldest, who is youngest in your family.  
● Calculate the age of a person seeing the birth certificate.  
● Listing days/dates/months of various festival of India (in order of month).  
● Represent a story on time line.  
● Patterns in calendar.  
● Net resources and worksheets. | ● Calculates the time taken to complete an activity.  
● Understands the use of time.  
● Understands the use of clock.  
● Understands the use of calendar.  
● Draws a clock.  
● Sequences the events chronologically.  
● Makes own time line.  
● Solves problems based on time and calculate.  
● Discovers pattern through a calendar. | ● Clock  
● Calendar Charts | ● Understands and appreciates value of time  
● Punctuality | 12+8 |

| Oct   | Measurement Weights | Lesson - 8 Who is heavier | Understanding of weight.  
Understanding of heavier/lighter.  
Comparison of weights.  
Knowledge about balance.  
Guess the weight.  
Making of toy balance.  
Unit of weights. | Using a toy balance compare the weight of few objects like eraser, pencil, sharpener, notebook, pencil box etc.  
Find out your own weight?  
group activity on heavy and light objects.  
Compare 1 Kg flower and 1Kg stone[weight and volume] listing things we buy mostly in Kg's/gms and miligrams.  
Guess weights of object and match.  
The objects which will weigh more.  
Guess the weight? and then find out by actually weighing it?  
Paste the pictures of different types of balance. | Compares the items which is heavier?  
Understands the use of balance.  
Knows the units of measuring weight (Kg, gm).  
Understands the meaning of half a Kg, pinch of salt.  
Lists the things according to weight.  
Compares heavy/light. | Balance  
Weights | Estimation  
develops an idea about weight of the object and its relation with size and space occupied. | 16 |

| Nov   | Numbers Multiplication. Patterns. | Lesson-9 How many times | ● Understanding of multiplication (as repeated addition).  
● Identification of sign of multiplication.  
● Understanding of construction of multiplication.  
● Understanding of patterns in multiplication.  
● Solving word problems. | ● How many altogether?  
● Multiplication as repeated addition  
● Write repeated addition as multiplication  
● Multiply using expanded notation  
● Column method of multiplication  
● Multiplication by zero  
● Write the multiplication facts  
● Multiplication by 10, 100, 1000  
● Multiplication by 1  
● Games can be played to teach tables of 2's, 4's, 5's, by skip counting.  
● Complete the factor tree.  
● How much do these things cost?  
● Some word problems on multiplication  
● Practise questions from question banks  
● Worksheet. | ● Counts the objects in each collection (in rows/columns).  
● Draws the objects in rows/columns.  
● Identifies the sign of multiplication.  
● Relates multiplication as repeated addition.  
● Guesses and estimates the products.  
● Multiplies with 2 digit numbers  
● Completes the pattern based on multiplication.  
● Multiplies any number by 10, 100, 1000 etc.  
● Solves word problem related to multiplication.  
● Multiplication by zero. | ● Flash cards of numbers.  
Multiplication grid.  
● Sticks.  
● Marbles  
● Chalk pieces  
● stones. | ● Understand relationship between addition and multiplication. | 15 |

|       | ● Geometry  | Lesson - 10 Play with Patterns | ● Geometrical shapes.  
● Patterns.  
● Numbers.  | ● To observe and understand the pattern.  
● To identify pattern in his surroundings.  
● Making of pattern.  
● Drawing patterns.  
● Recognises the basic unit for generating pattern.  | ● Observes the pattern around them eg. Grill of windows, tiles, print on a cloth, border of saree etc.  
● Continues the pattern by observation.  
● Creates pattern.  
● Does completes different shapes to create a pattern.  
● Colour and complete different shapes to create a pattern.  
● Patterns consisting of shapes, alphabets, numbers and pictures can be given to students to observe them and complete them.  
● Make a grid and colour all odd/even numbers.  
● Message can be written using alphabets, numbers and numbers coding and decoding.  
● Arrange the names of 10 of your friends in alphabetical order.  
● Worksheet  
● Net resources  | ● Identifies simple symmetrical patterns.  
● Makes patterns and designs from straight lines and other geometrical shapes.  
● Identifies patterns in the numerals for odd and even numbers and in adding odd and even numbers.  
● Identifies patterns in his surroundings.  
● Realizes the role of creating a pattern.  
● Decodes the secret messages based on patterns.  
● Integration with art and craft.  | ● Flash cards of alphabets, numbers.  
● Cut out of different geometrical shapes.  | ● Identification and creation of various pattern.  | 12 |

| Dec   | **Measurement** | Lesson -11 | Jugs and Mugs    | • Measures and compares the capacity of containers in terms of non standard units.  
• Getting rough idea how much one litre is.  
• Estimation and comparison.  
• Measuring the capacity of 1 litre water bottle using different containers.  
• Collect some old cups, mugs, jugs, glass, bowl etc. and check which of these hold more than 1 litre and which of these hold less than 1 litre.  
• Draw drawings of some containers.  
• Compare between two jugs and identify which one holds more water.  
• Filling pot holes in the play ground using pebbles/sand in mugs of same size.  
• Find out how many glasses of water you drink in a day.  
• Create sand patterns with capacity.  
• Which of the following will you measure in litres and millilitres eg. a tank of water?  
• Worksheets                                                                    | • Understands that only liquids can be measured by containers of known capacity.  
• Compares different containers in terms of capacity.  
• Gets the idea of half, twice, four times etc.  
• Estimates and guess the quantity.  
• Solves word problems related to capacity (liquids)                           | • Different types of containers Measuring flux/container                        | •Comparison  
• Estimation  
• Conservation of water                                                      | 11                             |
| Jan   | **Numbers**    | Lesson - 12 | Can we Share     | • Meaning of division from context of equal grouping and sharing.  
• Relates division with multiplication.  
• Completes division facts.  
• by grouping  
• by using multiplication table.                                                | • Divides objects equally into groups.  
• Knows the symbol of division.  
• Writes the corresponding division facts of a given multiplication facts.  
• Divides the children using multiplication table.  
• Solves questions based on division using multiplication table.  
• Solves word problems.  
• Frames verbal problem.  
• Puzzles.  
• Divides by 10, 100.                                                          | • Marbles  
• Stones  
• Chalk pieces  
• Leaves  
• Toffees, etc.  
• Puzzle games on division and multiplication.                                  | Sharing Equal distribution. Logical thinking Reasoning.                    | 20                             |

| Feb   | Data Handling. | Lesson - 13 | Smart Charts | ● Records data using tally marks.  
● Collection of data and representation through pictographs  
Conclusion from the data | ● Counts the number of similar objects and make the table.  
● Records data using tally marks.  
● Records the data in terms of pictograph by choosing appropriate scale and unit.  
● Presents in the form of bar charts and tables  
● Draws inferences and conclusions from the data.  
● Solves problem based on data given.  
● Answers the questions based on pictorial representation of data. | ● Recognition  
● Observation  
● Classification  
● Collection of data. | 7 |
| Feb   | Money  
● Numbers (Basic Operations)  
● Patterns | Lesson - 14 | Rupees(₹) and Paisa | ● Knowledge about rupees and Paisa.  
● Addition and subtraction of Rupees(₹) and Paisa.  
● Making of rate charts and Bills.  
● Word problems on money | ● Converts Rupees(₹) to paisa and vice-versa.  
● Understands the need and value of money.  
● Writes money in short and long form.  
● Buys and sells things.  
● Prepares a bill. | ● Notes and coins of different denominations  
Money game. | 12+12 |
